

Vyatta for Hosted Services

Vyatta addresses the needs of hosted services providers by delivering a complete routing and security solution that offers affordable Gigabit Ethernet connectivity options in a 1U rackmountable hardware appliance. Vyatta also offers users the choice to deploy on any standard x86 server hardware or in VMware or Xen virtual environments. With integrated routing, firewall, intrusion prevention, and more, plus your choice of platform, Vyatta is an ideal solution for connecting and securing applications and services in a hosted environment.

| Base Platform | | | |
|-------------------------------|--------------|----------------|----------------|
| | Vyatta 514 | Vyatta 2501 | Cisco 2821 |
| Base Platform | \$797 | \$2,347 | \$3,349 |
| Security (Firewall, VPN, IPS) | included | included | \$709 |
| Technical Support | included | included | \$161 |
| Total Base Unit | \$797 | \$2,347 | \$4,223 |

The Vyatta Advantage:

- >> Complete advanced routing and security feature set
- >> 1U form factor requires minimal rackspace
- >> Better GigE capacity, availability and pricing than Cisco
- >> Ability to run in VMware and Xen virtual environments
- >> Support and services bundled with Vyatta appliances
- >> Greater memory capacity for increased performance and scalability
- >> Leverage affordable and available x86 components for upgrades
- >> Up to 81% cost savings over Cisco 2821
