

Vyatta Service Engagements are available as:

Quick Start Configuration

- » Generate Working Configuration
- » Migrate Configurations from Existing Equipment
- » Software or Appliances

Professional Consulting

- » Network Design & Implementation
- » Interoperability Testing
- » Network Audits
- » Custom Training

Software Upgrade Package

- » Simplify Upgrades
- » Software Maintenance
- » Validate Security
- » Verify Configuration

Vyatta Services are designed to help customers simplify design, installation, configuration and management of Vyatta subscription edition software and Vyatta appliances. From packaged installation and upgrade services to completely custom consulting agreements, the technical team at Vyatta has the knowledge and experience to get your Vyatta-based network up and running and maintaining optimal performance.

Vyatta Services		
Quick Start Configuration	Professional Consulting	Upgrade Services
Simplify Initial Installation	Complete Planning & Design	Remotely Manage Upgrades
Manage Moves/Adds/Changes	Custom Training	Software Maintenance
Starting at \$497 per unit	Starting at \$220 per hour	Starting at \$297 per unit

Quick Start Configuration Service

With the Quick Start Configuration Service, you complete a simple questionnaire, and Vyatta's technical experts will generate a configuration for you that can be loaded onto your system or Vyatta appliances. In addition to saving you time, you are also leveraging the technical knowledge of Vyatta experts to reduce mistakes and implement security best-practices, all for one low price per unit.

Vyatta's Quick Start Configuration Service can help you implement:

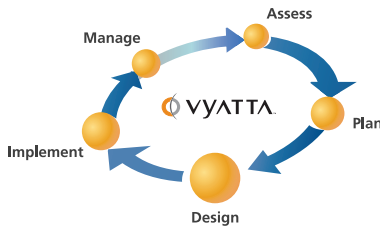

- » Basic system security
- » Firewall
- » Network Address Translation
- » DHCP client
- » DHCP server
- » Site-to-site VPNs
- » Remote access VPNs
- » BGP, OSPF, and RIP routing
- » VRRP
- » WAN load balancing
- » VLANs
- » and more...

Professional Consulting Services

The Vyatta professional services team also delivers completely custom consulting services ranging from network design and implementation planning to live training. If your network requires complex configurations or if you need a detailed migration plan or implementation strategy, Vyatta will designate an experienced Vyatta engineer to help you complete your project.

Custom Professional Services Engagements include:

- » Network architecture and design
- » Configuration and implementation planning
- » Installation and configuration checking
- » Network audits
- » Upgrade or network migration planning
- » Interoperability testing
- » Training

Vyatta's Software Upgrade Service

Vyatta's Software Upgrade Service allows you to leverage Vyatta's expert technical team to expedite software upgrades. Simply tell Vyatta which systems need to be upgraded and Vyatta technical staff can perform the work remotely. Vyatta will ensure that the work gets done with a minimum of downtime and will work with you to schedule the upgrade so that it presents a minimum of disruption to your users.

Software Upgrade Service activities include:

- » Pre-Upgrade:
 - Check operating condition
 - Check system security
 - Backup system configuration
- » During the upgrade:
 - Download the appropriate revision of Vyatta software
 - Install the software
 - Reboot your system
- » Post-Upgrade
 - Verify basic network connectivity
 - Verify operating condition
 - Perform any required configuration file changes manually
 - Recommend Best Practices

Why use Vyatta Services?

Technical Expertise:

The Vyatta professional services team knows Vyatta products and networking inside and out. Leveraging the technical knowledge of Vyatta experts can reduce configuration errors, improve security and expedite installation.

Investment Protection:

Vyatta technical experts can assist you in planning a solution that will meet your needs today and scale for the future.

Optimization:

Vyatta products are designed to be very flexible. The Vyatta professional services team can help you design a Vyatta solution and a network that maximizes performance & uptime.

Knowledge:

Learn what you really need to know about your Vyatta deployment. Our team can provide the technical expertise to ensure you can effectively configure, manage & support your Vyatta-based network.

About Vyatta

Vyatta has reintroduced innovation to the networking industry by leveraging open source technologies and the performance increases of x86-based processors. This innovation has allowed Vyatta to create routing and security appliances that scale from the branch office to the service provider edge, use standard x86-based Intel/AMD hardware and components, run in VMWare, Xen and Hyper-V virtual environments and allow users to customize networks. Oh, and all of that can be done for a fraction of the cost of proprietary systems. For more info, visit <http://www.vyatta.com>.
